Versatile Hopper

- High Volume In/Output Hopper (Max. 500)
- Multi- Hopper
- Residual Q'ty Sensor
- Physical Lock & Kensington Lock
- Scratch Free

• Input Hopper

To disperse the weight of the stacked cards, the card mallet pushes cards to the weight dispersion point and the lowest card is drawn out by hook. This process prevents the stacked cards from making scratches on the lower cards' surface.

• Output Hopper

When a card is put in the output hopper, to protect the card's surface, the loaded cards are raised by the support beam which is operated by the internal CAM.
